

GOTEQ
TRANSPARENT RECRUITMENT

We're all about building longterm partnerships

We like to think that it's our approach and attitude to business that is the key to developing these relationships.

When it comes to placing individuals in new roles, permanent, contract or temporary, we know how important it is to ensure the right fit for them and the organisation they will be working in.

We work hard to support businesses to achieve their aims and individuals to reach their career goals. This approach, combined with a large dose of commitment, knowledge and experience, has been the key to our success in securing clients who turn to us to fulfil all their recruitment needs.

If your business is looking for a recruitment partner, willing to go the extra mile, then get in touch. Whether you are looking for a permanent employee to become a key member of your organisation or a team of temporary workers with specific skills and experience for a project, we can help.

We take the time, **every time**, to get to know the businesses we work with and to fully understand their needs

We know that our success depends on finding the **right candidates** for the **right role**. We consistently achieve this through a combination of specialist industry knowledge and a thorough understanding of the job markets in our core sectors. Not to mention determination, tenacity and lots of hard work.

With each role we fill we strive to closely match the candidate, their skills and their experience to the right opportunity.

How we can help your business...

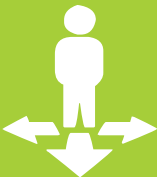

Permanent Recruitment

An organisation is only as good as the people who work there – our job is to identify the people who will help make a difference to your company. From shopfloor blue-collar roles through to white-collar and director level, we've got the skills to find the right candidate for you.

Skilled Temporary Staff

We specialise in the supply of skilled, reliable temporary contract labour for many technical, construction and manufacturing sectors. We can supply fully trained, dedicated personnel for your projects, ensuring your contract runs smoothly and on-time.

Redundancies & Outsourcing

Redundancies are an unfortunate, but often necessary, part of business. We have dedicated staff who can offer training and support during this time, ensuring a stress-free transition for your staff who wish to seek employment using their skillsets elsewhere.

We're not a typical 9-5 business and pride ourselves on being **responsive** and **available** as well as **transparent** in our working relationships.

If you're looking for a recruitment partner to support your business then get in touch.

We'd love to discuss your staffing requirements and how we can help you to ensure you have the right staff on board at the right time.
